

Wolseley is now stocking A.O. Smith Commercial Electrics.
The most complete line of commercial electric products.

Gold Series DRE Model

The Gold Series is now standard with Goldenrod elements. This is the industry's most popular line of commercial electric heaters. Available in 50, 80 & 119 gallon sizes.

Advanced Electronic Control System for DVE

An intelligent control system with easy to navigate menu provides precise temperature control and unit operating information

Good As Gold

Want to make sure your water heater lasts longer? Both our DRE and DVE models come with gold-plated elements that resist lime scale and calcium adhesion as well as sheath temperatures up to 1500 degrees F.

Gold Xi Series DVE Model

The Gold Xi Series features advanced electronic control and gold elements. Available in 50, 80 and 119 storage tanks. Use as recovery heaters or as boosters

SETTING THE GOLD STANDARD

A. O. Smith now offers **conversion kits**, making inventory management that much easier!

Available on DRE and DVE only. Each kit comes with elements, gaskets and labels for them to place over the top of the existing rating plate. To be installed by qualified electrician.
